EXECUTIVE SUMMARY

Career changer combining customer-facing hospitality operations with hands-on IT support labs, targeting desktop support, service desk and MSP roles. Practical experience with Microsoft 365, Entra ID, Intune, Conditional Access, Windows Server/AD DS, ticketing and PowerShell automation; comfortable troubleshooting user access issues, documenting incidents and escalating clearly when required.

TECHNICAL SKILLS

Desktop support & service desk: Windows Server, AD DS, password/user administration, RDP/Bastion, osTicket, ticket triage and documentation, VPN/access/printer support scenarios

Microsoft 365 & endpoint management: Microsoft 365, Entra ID, user/licence administration, dynamic groups, MFA, Conditional Access, Intune compliance/configuration/update/app policies

Azure & identity: Azure VMs, Storage Accounts, Blob Storage, Key Vault, Managed Identity, Azure RBAC

Troubleshooting & networking: TCP/IP, DHCP, DNS, ICMP, TCP/HTTP, authentication/access faults, Docker logs, Uptime Kuma, Application Insights, API/CORS troubleshooting

Automation & tooling: PowerShell 7, Microsoft Graph, Git/GitHub, Docker Compose, MariaDB, Terraform, GitHub Actions

IT SUPPORT PROJECTS

Microsoft 365 / Intune Helpdesk Lab

[GitHub](#) | 2026

- Built a Microsoft 365 Business Premium lab with Entra users, dynamic department groups, licence administration, MFA and Conditional Access in report-only mode; automated joiner/leaver workflows with PowerShell 7 and Microsoft Graph, and configured Intune compliance, configuration, update and app policies with six operational runbooks.

IT Operations Homelab

[GitHub](#) | 2026

- Recovered an osTicket/MariaDB authentication failure by checking Compose configuration, container state and service health; simulated an outage, detected it in Uptime Kuma, restored service and documented the incident in a ticket.

Windows Server / Active Directory Lab

| 2026

- Built an Azure-hosted Windows Server environment through Bastion/RDP, installed AD DS, created a forest/domain controller and practised user administration, password resets and account recovery for repeatable L1-L2 support workflows.

PowerShell IT Support Toolkit

[GitHub](#) | 2026

- Built PowerShell 7 checks for DNS, ICMP, TCP, HTTP and account-access faults; scripts return structured results for filtering/export, with GitHub Actions parsing scripts and running a smoke test.

PitWall - Azure Troubleshooting

[GitHub / Live](#) | 2026

- Resolved a Static Web App-to-Function CORS failure by correcting the allowed origin and validating the fix with Application Insights traces; added retry/backoff and private Blob caching to make failures easier to diagnose.

EMPLOYMENT

Kitchen Hand / Deli Assistant - GumTree Good Food, Melbourne

2024-Present

- Work in a high-volume customer-facing hospitality environment, serving deli customers, answering queries, preparing food, receiving deliveries and coordinating with drivers and colleagues while prioritising competing tasks during peak service.

EDUCATION

Dev Academy Aotearoa New Zealand - Full-Stack Web Development Bootcamp

2023

6-month intensive program covering React, SQL, Git, pair programming and collaborative problem solving.

Harvard CS50x - Introduction to Computer Science

2024

Computer science fundamentals, algorithms and data structures using C, Python and SQL.
